# General Categories of Weaknesses (aspects)

Taxonomy

Tasks which can be run in parallel that the process allows

Parallelizable tasks

Back-loop

Series of activities occur in a repeated pattern as the process allows it.

Redundant Activity

Process

Activity that repeats as the process allows it

Log

Contains

Instance of

Cases

If a follow b in one or more steps in the same case

Eventually Follows

Interface or media change

If the resource has changes for the same activity in the same case

Contains

Activity that took the maximum time across the log or in a case

Bottle Neck

Activity

Instance of

Events

If an activity is done by a resource who is not supposed to.

Incorrect resource/roles

Variance of Process Time

Activity that is in forbidden list

Unwanted Activity

Unutilized time between 2 events

Idle time

Min, Max, Average, Variance for each activity
